

## Environment Policy

Operative Date: 9 June 2022

### 1. Policy Purpose

AGIG's vision is to be the leading gas infrastructure business in Australia by delivering for customers, being a good employer, and sustainably cost efficient. Environmental and social responsibility is a key element of our vision.

Environmental stewardship is critical to the success and sustainability of our business. The Environment is also a key focus of our Environmental, Social and Governance (ESG) program, including short and long term targets for a sustainable business.

AGIG believes that we are all individually accountable and empowered to ensure our actions are without undue adverse impact upon the environment.

### 2. Key Objectives

Our key objectives are to:

- Conduct environmentally responsible operations and minimise environmental impact wherever possible.
- Align our carbon emissions footprint with national and state policy and regulations.
- Create a culture and environment where every employee is personally committed to managing impacts to the environment.
- Provide resources and support to meet our emerging ESG targets.
- Act consistently with AGIG's values, including working in a safe and professional manner.

### 3. Achieving Objectives

We will achieve this by:

- Embedding environmental considerations into business decisions and processes
- Promoting environmental awareness and fostering a culture of respect for ecological values.
- Effectively consulting with our employees, contractors, customers and key stakeholders on environmental matters and establishing an escalation mechanism for matters requiring management intervention.
- Driving a culture where employees and contractors take ownership and are accountable for environmental performance.
- Developing processes and systems to identify, assess and control environmental risks and to ensure the management of risk to as low as reasonably practicable.
- Establishing and maintaining pragmatic and flexible environmental management systems that are tailored to our risks, drives achievement of our vision and are regularly reviewed for currency, relevance and effectiveness.
- Allocating the appropriate resources and providing the necessary information, instruction, training and supervision to enable implementation of the environmental management systems.
- Setting a clear low carbon strategy for the business to decrease carbon emissions.

- Diversify strategies to proactively deliver on low carbon strategy.
- Effectively reporting, recording and investigating environmental incidents and near misses in the workplace and taking proactive measures to prevent recurrence.
- Maintaining preparedness to respond promptly to environmental incidents to mitigate the nature and scale of unintended impacts.
- Setting, monitoring and communicating meaningful performance measures to drive continuous improvement.
- Continually review and improve our performance and target setting within our ESG program.
- Regularly auditing our operations to monitor compliance with statutory obligations and conducting accurate and transparent reporting on any findings.
- Complying with all applicable laws, regulations and standards for the protection of the environment.
